Subject: Bautsch-Gray Mine Superfund Site (IL) - Informal Information Request of September 24, 2013

Mr. Hartness,

I had to check with USDOJ on your informal information request of Tuesday, September 24, 2013.

I am authorized to respond as follows:

The information that is available on the current condition of the Bautsch-Gray Mine Superfund Site may be found at this web link: <http://www.epa.gov/region5/superfund/npl/illinois/ILN000510407.html>

The Superfund RI/FS process that will be followed at the Bautsch-Gray Mine Superfund Site is described in detail at this web link:

http://www.epa.gov/oswer/riskassessment/ragsa/pdf/rags_ch1.pdf

Finally, USEPA does not, as a rule, informally release the names of specific USDOJ attorneys on our active cases prior to their filing formal appearances in court.

I hope that this is helpful. Please feel free to contact me with any comments or questions by email or at 312/886-6613. Thanks.

Tom Turner, USEPA, ORC, Region 5
